

Made in Italy
for the **food & beverage**
industry

Do you challenge
a **subzero world**
every day?

We have the ideal solution in stainless steel

A family passion since four generations

Founded in 1943, AVO - Aldo Valsecchi S.p.A. represents one of the historical brands in the production of "made in Italy" wheels and castors. Our core values have always been experience, quality, technological innovation and a great family passion, which began with grandfather Aldo and has been passed down to the current fourth generation. The customer, then, has always been at the center of our attention; this is why we have chosen to create products suitable for the most diverse sectors, which can meet the most specific needs. The wide range of AVO castors also includes items suitable for the food sector, a field in which the choice of raw materials and the technical characteristics of castors and supports are fundamental in order to meet the needs of resistance to cold, heat, hygiene and durability.

AVO Wheels and Castors
when **hygiene**,
resistance and **safety**
are essential

PERFECT FOR ICE CREAM AND CHOCOLATE SHOPS

Wheels and Castors ideal for food & beverage

In the **food and wine industry**, the choice of raw materials and the technical characteristics of wheels and castors are crucial to meet the needs for cold or heat resistance, hygiene and durability, which are essential for those working in these sectors.

The new color **BLUE AVO** is specially designed for the food industry. Due to its high visibility, this particular tint makes it easier to identify any particles that might come into contact with food. Combined with the **stainless steel** of the caster, it guarantees a perfect hygiene!

NEW AVO BLUE COLOR
